CAREER PROFILE

Hi, I'm a PhD student specializing in the use of evolutionary methods for the optimization of neural networks as intelligent agents. I recently graduated as an ISAE-SUPAERO engineer, and have been honing my coding skills on multiple side projects for the last decade.

PhD in Machine Learning Supervised by Emmanuel Rachelson, Dennis G. Wilson ISAE-SUPAERO, Toulouse, France	2021-Present
PhD topic: Evolutionary strategies for neural policy search. Application: game-playing, control tasks, Reinforcement Learning Intern co-supervision: Tarek Kunze on GENE encoding extension. Published work: see <i>Publications</i>	
Visiting PhD Student Supervised by Antoine Cully Imperial College London, UK	Mar-Jul 2023
Visiting student at Antoine Cully's Adaptative & Intelligent Robotics Lab (AIRL) at Imperial College London to work on evolustrategies for policy search applied to robotics, and on the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination of evolutionary methods with reinforcement learning and the combination devolutionary methods with reinforcement learning and the combinationary methods with reinforcement learning and the comb	ution ng.
Research Intern Supervised by Dennis G. Wilson ISAE-SUPAERO, Toulouse, France	May-Nov 2020
Research internship on neuroevolution (evolution of neural networks with genetic algorithms)applied to video games. Optimizing artificial neural networks with evolutionary algorithms	
Ranked first in the GECCO 2020 competition on evolving a DOTA 2 bot.	
Cybersecurity Consultant Wavestone, Paris, France	Feb-Aug 2020
Internship subject: current and future uses of AI for cybersecurity intrusion detection & response. Developing a PoC of Ma Learning for anomaly detection in a Security Operation Center. Other missions: EBIOS risk analysis, impacts on cybersecur emerging technologies.	chine rity of
Member of the Board ISAE-SUPAERO, Toulouse, France	2017-2020
Elected mandate as Students Representative on the ISAE-SUPAERO board.	
CEO's Right Hand Pricemoov, Paris, France	Jul-Dec 2019
Leading high-stake international projects with long-term implications in an AI-focused startup. Structuring internal process implementing management KPIs.	ses and
Quality-Audit analyst SUPAERO Junior Conseil, Toulouse	2016-2018
Continuous improvement of ISAE-Supaero's Junior-Entreprise processes, developing tools in Excel / VBA. Member of the S Guidance Board until 2021.	Strategic
Member of the Board Lycée J-B Say, Paris	2015-2016
Elected mandate as CPGE Students Representative on the board of Lycée J-B Say.	

EDUCATION

MSc in Aerospace Engineering ISAE-SUPAERO	2016-2020
Masters in general engineering, applied to aerospace problems. Specialized in Data Science (major) and Robotics (minor). F projects:	Research
 Deep Learning to solve NP-hard problems Deep Reinforcement Learning for human-machine cooperation. 	
MSc in Operations Research ISAE-SUPAERO	2019-2020

Additional MSc coupled with the Data Science specialization with classes on:

- Optimization,
- Advanced combinatorial optimization
- Stochastic and evolutionary methods

- 📙 Resume PDF

LANGUAGES

French (Native) English (Certificate of Proficiency - C2) Spanish (Independant - B2)

CODING

Python (Proficient, teaching experience) Julia (Professional experience) C / Java (Academic experience) JS / HTML / CSS (Side projects) Jax, pytorch, sklearn, pandas, MPI, Ray (Computing tools)

INTERESTS

Evolutionary computation Machine Learning Reinforcement Learning Evolution Strategies Open-ended evolution Auto-ML Robotics

HOBBIES

Cooking Game developme Preparation for national competitive exams leading to French "Grandes Ecoles". Ranked (among 2556 candidates):

• 28th at "Concours Commun Mines-Pont PT"

• 33rd at "Concours Centrale-Supélec PT".

E TEACHING

Python - Algorithm and Computing Class managed by Jérôme LACAN ISAE-SUPAERO (30h)	Oct-Dec 2022
Teaching python to students in the FISA program:	
 Basics of Python and algorithms 3D representation of planet movements Introduction to embedded systems with Micro:Bit 	
Python - Algorithm and Computing Class managed by Jérôme LACAN ISAE-SUPAERO (5h)	Oct 2022
Python class for students from the Master of Science in Aerospace Engineering.	
Bash & Python Class managed by Dennis G. Wilson ISAE-SUPAERO (14h)	Sept 2022
Introduction to Bash, Git and Python for students in the last year of the MSc Eng. program.	
Evolutionary Computation Class managed by Dennis G. Wilson ISAE-SUPAERO (18h)	April 2022
Elective module on evolutionary computation for students in their 1st year of MSc Eng. I supervised group pr the module and gave 3 classes:	rojects for the evaluation of
 Evolution of neural networks Genetic representation and operator design Quality-diversity approaches, evolution of behavior, coevolution 	
Python - Algorithm and Computing Class managed by Jérôme LACAN ISAE-SUPAERO (30h)	Oct-Dec 2021
Teaching python to students in the FISA program:	
 Basics of Python and algorithms 3D representation of planet movements Introduction to embedded systems with Micro:Bit 	
Evolutionary Computation Class managed by Dennis G. Wilson ISAE-SUPAERO (4h)	May 2021

Elective module on evolutionary computation for students in their 1st year of MSc Eng. I gave 2 classes of the module:

Evolution of neural networksQuality-diversity approaches, evolution of behavior, coevolution

PROJECTS

Here are some of the recent projects I worked on, either during my PhD or my Masters degree, or as personal side projects.

BERL - Benchmarking Evolutionary Reinforcement Learning: a python framework to test and evaluate Evolution Strategies for RL tasks, with MPI parallelism

GENE - A Geometric Encoding for Neural Network Evolution

NeuroEvolution.jl - A Julia implementation of NEAT-based neuroevolution algorithms (NEAT, CPPN, HyperNEAT)

Multidimensional GP for multiclass classification - Jupyter notebook implementing, presenting and explaining a research paper for Data Science specialization.

Genepy - Artificial life simulation in a 2D environment, with a custom implementation of NEAT for the brains.

Groinkbot - Multi-platform chatbot framework, based on a modular architecture and with a high-level interface.

Compute - Python tool to easily configure and run experiments on remote hosts with pre-defined configurations through SSH

Solvers - Bruteforce solvers for puzzle games like Minesweeper or Scrabble.

TALKS

Ma Thèse en 180 secondes - Regional Finals (FR) Théâtre Sorano (460 people) - Video	25 March 2022
Regional finals of the MT180 competition, where PhD students have 3 minutes to explain their research topic to a broad	public.
A Geometric Encoding for Neural Network Evolution GECCO 2022 (online) - Video	21 July 2021

Presenting our GENE paper at GECCO 2021. The video was pre-recorded.
